# **SEX IN EFT**

## **Helping Couples with Sexual Issues in EFT**

Talking about sexual issues with couples can be challenging for both therapists and clients. This workshop is designed to help therapists integrate sex therapy concepts with Emotionally Focused Couples Therapy. Learn about the following concepts:

- Dual Control Model
- Sexual Response Models
- Closeness and Separateness
- Sexual communication

Then, be able to apply those concepts to these topics:

- Desire Discrepancies
- Initiation Issues
- Sexual Dysfunction
- Porn use and Infidelity
- Helping couples build their sexual communication skills within an EFT framework

And, you'll start applying these concepts with experiential exercises and time for feedback and questions.
